

Jatin Kumar Singh

INFORMATION SECURITY ANALYST

Delhi, IN | 8175033816 | singhjatin1603@gmail.com | [linkedin.com/in/jatinsingh1603](https://www.linkedin.com/in/jatinsingh1603) | github.com/jatinsingh1603

PROFESSIONAL SUMMARY

Cybersecurity professional specializing in Application Security and AI-driven automation. CRTP - Certified Red Team Professional by Altered Security certified, with validated hands-on skills in Active Directory attacks and red team operations. Hands-on experience across VAPT and building production-grade AI automation workflows using n8n. Recognized by Google, CERT-In and Kraken through responsible disclosure. Currently designing security automation platforms that reduce manual effort in TPRM, vendor due diligence, and regulatory compliance (SEBI CSCRf).

CERTIFICATIONS

CRTP - Certified Red Team Professional (Altered Security)

EXPERIENCE

Information Security Analyst | Tinycrows Private Limited (Hybrid)

June 2025 - Present

- CERT-In Empanelment: OFFPST, OLPST & PIS: Cleared the OFFPST and OLPST examinations and PIS (Personal Interaction Session) conducted under CERT-In empanelment requirements, validating hands-on offensive security competency at a national level and securing CERT-In empanelment for Tinycrows.
- Threat Detection: Analyzed security logs and recreated real attack scenarios for a major UPI provider, exposing detection blind spots and strengthening their threat detection coverage.
- AI Merchant Risk Tool: Built an automated merchant onboarding system using n8n for an Indian fintech bank, replacing manual due diligence with automated checks and approvals for faster decisions and reduced analyst workload.
- GRC Assessments: Reviewed company security policies and controls against CSCRf and internal compliance standards, documenting gaps and remediation guidance to confirm compliance readiness.
- Web Penetration Testing: Tested client web applications using Burp Suite, OWASP ZAP and Nmap, manually verifying each issue and reporting confirmed vulnerabilities with remediation steps.
- Security Reports: Wrote clear, evidence-based reports explaining what was found, how serious it is, and how to fix it, enabling engineering and risk owners to act from a single document.

PROJECTS

1. AI-Powered Third-Party Risk Management (TPRM) Platform

n8n · AI Agents · Automated Reconnaissance · Vendor Due Diligence

- Designed and built an end-to-end vendor risk platform replacing manual TPRM workflows, covering onboarding, criticality tiering, technical due diligence, and reporting in a single automated pipeline.
- **Vendor Onboarding & Criticality Engine:** Built AI agents that collect vendor data and auto-populate risk profiles, removing manual data entry.
- **Cyber Due Diligence Scanner:** Automated external assessment across 20+ parameters SSL/TLS, SPF, DKIM, DMARC, security headers, vulnerability baseline, open ports, exposed services — producing evidence independent of vendor self-attestation.
- **Due Diligence Workflow:** Automated security questionnaires with AI validation of vendor responses against uploaded documentation, flagging unsupported claims.

2. AI-Powered SEBI CSCRf Compliance Platform

n8n · AI Agents · GRC Automation · Regulatory Compliance

- Designed an AI-driven compliance platform that enables organizations to assess and document their posture against SEBI Cybersecurity and Cyber Resilience Framework (CSCRf).
- **Guided Assessment:** Structured questionnaire mapping analyst responses directly to CSCRf control requirements, removing framework-interpretation guesswork.
- **Document Intelligence:** AI agent ingests uploaded policy and evidence documents, extracts control mappings, and validates coverage against claimed controls.
- **Public Data Enrichment:** Agent scrapes publicly available organizational data to pre-fill details and cross-validate disclosures.
- **Compliance Scoring:** Quantified alignment score against CSCRf controls, exposing exactly where the organization falls short.

KEY ACHIEVEMENTS

- **Eclipse 6.0 Hackathon - Winner:** Won the Eclipse 6.0 Hackathon at Thapar Institute of Technology by building and demonstrating the AI-Powered Third-Party Risk Management (TPRM) Platform.
- **Sprint4Good Hackathon - 2nd Runner Up:** Secured 2nd Runner Up at the Sprint4Good Hackathon organized by NASSCOM Foundation and Cisco at IIT Delhi, showcasing the Automated SEBI CSCRf Compliance Platform.
- **India Innovates Hackathon - 2nd Place (Security Domain):** Finished 2nd in the Security domain at the India Innovates Hackathon held at Bharat Mandapam, organized by the Delhi Government - showcasing the AI-Powered Third-Party Risk Management (TPRM) Platform.
- **Meta:** Discovered an AI Prompt Injection vulnerability in Meta AI that exposed internal infrastructure and sensitive employee data. Separately identified an IDOR vulnerability in Meta's

Mapillary platform.

- **Google:** Reported a persistent session flaw in a third-party application using Google SSO - sessions remained valid post-logout, enabling unauthorized access.
- **Kraken:** Awarded \$500 bounty for responsibly disclosing a critical misconfiguration in Kraken's desktop application.
- **IRCTC / CERT-In:** Discovered and reported a DOM XSS vulnerability on IRCTC to CERT-In - acknowledged and recognized by CERT-In.
- **The NorthCap University:** Reported XSS and DoS vulnerabilities in the college website and ERP portal. Gained unauthorized administrative access to the biometric attendance system by exploiting insecure network protocols.

EDUCATION

B. Tech CSE | The NorthCap University, Gurugram

2023 - 2027

CGPA: 8.39

TECHNICAL SKILLS

- **Security:** VAPT, Web/API/Mobile Application Security, Payment & PoS Security, Attack Surface Management, Threat Detection & Log Analysis, Responsible Disclosure, Bug Bounty Hunting, Cloud Security (Azure)
- **AI & Automation:** n8n Workflow Automation, AI Agent Design, LLM Integration, GRC Automation, Compliance Scoring Pipelines, Vendor Risk Automation
- **Tools:** Burp Suite, Nmap, Metasploit, OWASP ZAP, Shodan, Wireshark, Tenable (Nessus), Qualys, Docker, MobSF, Genymotion, Postman, Amass, Nikto, Azure (VMs, Budget Controls), Git
- **Frameworks & Standards:** OWASP Top 10, SEBI CSCRf, CERT-In Empanelment, ISO 27001 (conceptual), NIST.
